Profile

Creative and ambitious individual with a strong drive for personal growth, technology, and innovation. Currently building DermaAI, a personalized skincare platform leveraging AI and modern web technologies (React, Node.js, MongoDB). Experienced in frontend design (HTML, CSS, React, Tailwind) and project structuring, with a passion for creating visually appealing, user-friendly, and professional digital experiences.

Skills

- Frontend: HTML, CSS, React, TailwindCSS
- Backend (basic): Node.js, MongoDB, JWT authentication
- UI/UX: Clean, modern, minimalistic styling
- Tools: GitHub, VS Code, Canva/Figma basics, Upwork
- Soft Skills: Creativity, adaptability, client communication, problem-solving

Projects

DermaAI (in-progress)

AI-powered skincare product compatibility platform with features like OCR-based ingredient scanning, personalized skin profile, and premium model.

Tech: React, Node.js, MongoDB

Frontend: <https://shameemxy.github.io/DermaIQ/>

Personal Portfolio (Ongoing)

Professional portfolio website showcasing skills and work with animations and responsiveness.

Experience

- Freelance Work (Upwork): Client projects in branding, design, and websites.
- Independent Projects: Full-stack development (React, Node.js, MongoDB).

Education

Self-learning path in technology, web development, and design — supplemented with real-world projects and freelancing experience.

Interests

Web development & AI-driven solutions, personal growth (fitness, health), creativity & design, tech-based problem solving.
